DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I, claims 1-6 in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6 and 27-37 are rejected under 35 U.S.C. 102(b) as being anticipated by PCT Publication No. WO 96/28258 (Davies).

Davies teaches a composite roving comprising a continuous fiber bundle having a powder coating applied to an outer portion of the plurality of fibers. See abstract. The fibers can be of the type contemplated by applicants in claim 2 (see page 10) and the powder coating is of the sort set forth by applicants in claim 5 (see page 14). In addition, Davies teaches that powder coating can be present in amounts as required by applicants in claims 3-4. See Examples. Furthermore, Davies teaches that his bundle can be molded as required by claim 27. See page 6. Regarding claims 35-37, Davies teaches that his composite roving can be weaved, knitted or braided. See page 7. As

to claims 28-29 and 31-34, these claims are product-by-process claims, wherein patentability is based upon the product itself.

Therefore, the teachings of Davies anticipate the invention as claimed in present claims 1-6 and 27-37.

No claims are allowed.
